

**Speed controller Up**

Order No. 0310 00

**Speed controller Ap**

Order No. 0310 30

## Function

Speed controller for controlling the speed of single-phase motors such as induction, split-pole or universal motors.

Push actuator button: on / off

Turn actuator button: continuously variable speed control

The speed controller is installed in a 60-mm flush-type mounting box and has a power rating of 25-500 VA. If the unit is installed in a surface-type mounting box, the max power rating is reduced to 25-400 VA.

## Safety instructions

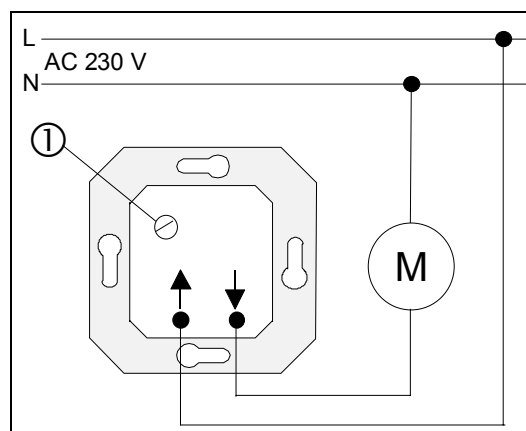

**Attention!** Electrical units must be mounted and installed by qualified electricians only.

## Mounting instructions

Depending on the type of mounting, the maximum power rating must be reduced:

- by 10% for every 5 °C above an ambient temperature of 25 °C
- by 15% for installation in wood and gypsum-plasterboard walls and in hollow walls
- by 20% for installation in combination with other units

Connect the unit in acc. with the circuit diagram. The basic speed is preset with potentiometer ① on the carrier board. In the event of malfunctions check first the fine-wire fuse. Use original fuses only.

---

## Technical Data

### Speed controller UP

Power rating: 25-500 VA  
Nominal current: 0,1 - 2 A  
Fuse: F 2 250 E

### Speed controller AP

Power rating: 25-400 VA  
Nominal current: 0,1 - 1,8 A  
Fuse: F 2 250 E

## Acceptance of guarantee

We accept the guarantee in accordance with the corresponding legal provisions.

**Please return the unit postage paid to our central service department giving a brief description of the fault:**
