

GIRA

Smart Home.
Smart Building.
Smart Life.

partner.gira.com

Sustainable design
lines made from
recycled material.

Gira / Design & function

We are Gira.
We are the ones with the switches.
But we're so much more.

Future-oriented.
Certified.
Responsible.

We're the guardians, innovators,
smart home pioneers, developers,
system experts, KNX partners,
shapers of the future, patent masters,
award winners and designers.

But above all, we're the ones
who listen.
To you.

Subtle, but smart.
With distinct focus on quality,
materials and functions.
And the driving force of innovation.

In our hearts, we are engineers
on a mission to inspire.
With new technologies,
smart applications, and
impressive attention to detail.

We will always work our hardest
to find the best solution for you.
With service, design and performance
made in Germany.

Because that is what we stand for.
And have been standing for since 1905.

in recycled material

05 _____ Gira E2 colour aluminium
and grey matt

06 _____ Item overview

12 _____ Company

Gira E2 light grey in recycled material.

54 %

lower carbon footprint compared to new material.

Sustainable design line made from recycled material.

The new Gira E2 light grey colour variant in recycled material is the right choice for customers with a strong awareness of environmental issues. The plastic parts of the design line consist primarily¹ of recycled materials with a carbon footprint that is around 54% lower than that of new materials². Many of the functions from the Gira System 55 are available in the light grey colour upon request.

In order to meet our technical quality requirements, we manufacture the recycled material using a particularly low-impact reprocessing method. As we run regular production cycles using a variety of scrap materials, the colour of the individual items may vary between batches. We have consciously chosen to retain this authenticity for the sake of pricing. The prices are the same as for the anthracite variant.

Further information:
partner.gira.com/e2-light-grey

Available upon request.
The delivery period is approx. 3 weeks.

⊕ Highlights, facts and benefits of Gira E2 light grey in recycled material:

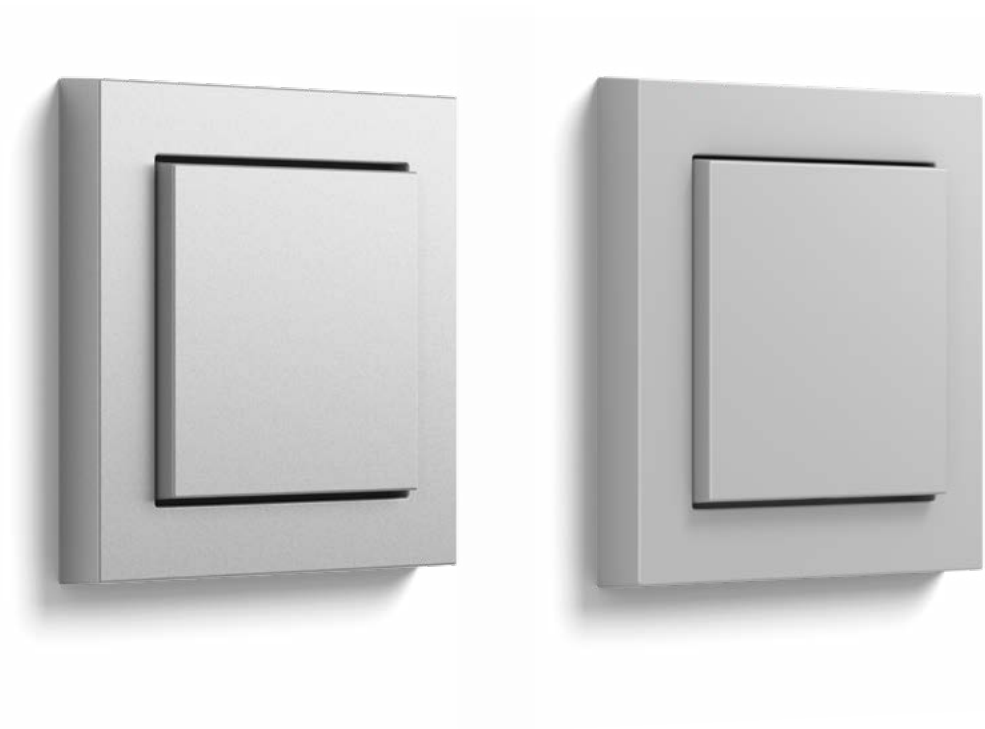

Saves resources and reduces CO₂.

Produced in-house from recycled materials.

¹ Only the socket outlet cover and additional components, such as transparent inscription spaces, are made from new materials.

² This reduction was determined on the basis of an ecological assessment pursuant to ISO 14040 of a 1-gang plastic cover frame.

Gira E2 colour aluminium and grey matt.

The Gira E2 in colour aluminium and grey matt is also partially made from recycled material. As usual, these colour variants are listed in the catalogue as a complete range, with over 200 functions. With their high-quality colour coating, these items present a resource-friendly alternative for the use of recycled material without potential colour deviations.

Being innovative means thinking beyond your own four walls.

Since 1905, we've been the ones with the switches, but we're so much more ... Because innovation is our great passion. Our pioneering spirit drives us to constantly improve and enhance the comfort of people's homes with innovative solutions.

"Made by Diversity".

Gira has been manufacturing products at its location in Radevormwald for more than 100 years. The company is fully committed to the "Made in Germany" quality standard. This is what 1,250 employees from 27 nations work for – each and every one of them with different talents, individual expertise, wide-ranging experiences and different life stories. This diversity – supported by shared values – provides the basis for our creativity, innovative strength and future viability.

Innovative technology,
award-winning design.

We have always aspired to combine maximum functionality and reliability with a unique design to create special user experiences. The extraordinary design quality and functionality of our products have been recognised by many internationally acclaimed awards.
